World Health  
Organization Warns:

# DEADLIEST Flu Season In A Decade

- **Flu Vaccine FAILS** Again, it's a mismatch
- **1 out of 2 Americans** predicted to get infected
- **50,000 Minimum DEAD** over the next few months

**PROTECT  
YOURSELF  
NOW!**

# 3 Reasons Why Flu Vaccines Will NEVER Work!

## 1 Influenza Viruses Are **Constantly Mutating!**

Viruses are constantly evolving and mutating from one form to another. Every year, actually every few weeks, old viruses are mutating to become new viruses. So, even though throughout history no flu virus epidemic has ever repeated itself, every year pharmaceutical companies continue to make the flu vaccine based on... *last year's influenza!* This is ridiculous because, even if you made a vaccine today to protect you from the exact virus that is spreading right now, by the time it's produced and used, the virus will have already mutated many times into a completely different virus.

The Center for Disease Control states, "Influenza seasons are unpredictable. The beginning, severity, and length of an epidemic can vary widely from year to year making it impossible to accurately predict the features of any season."

**Even the pharmaceutical manufacturers admit, "This is a serious problem and places serious doubts on the effectiveness of any influenza vaccine."**

## 2 Flu Vaccine Ingredients Are **Toxic And Disgusting!**

**DID YOU KNOW: If you had five consecutive flu shots in any decade your chance of getting Alzheimer's disease is TEN TIMES HIGHER?!** This is partially due to the mercury and aluminum that is in every flu shot (and most childhood shots).

## 3 Facts Prove The **Flu Vaccine Doesn't Work!**

A few decades ago less than 20,000 people a year died from the flu. Last year it was over 50,000! In the last 20 years the American population has only increased about 25%, while hospitalizations and deaths from influenza have more than doubled! Does it sound like the flu shot works?

Many medical experts now believe that influenza vaccines actually attack and weaken your immune system and make you even MORE susceptible to getting infected with the flu.

**Dr. J. Anthony Morris (former Chief Vaccine Control Officer at the FDA.): "There is no evidence that any influenza vaccine thus far developed is effective in preventing or mitigating any attack of influenza. The producers of these vaccines know that they are worthless, but they go on selling them anyway."**

## **BOTTOM LINE:** Don't Underestimate This Flu Season!

Americans will still suffer with over 1 BILLION cases of colds and influenza this season. That is an average of 3.5 colds and flu for every man, woman and child this year!

**FACT:** Every year influenza reaches epidemic proportions – 200,000 Americans will be hospitalized and 40,000 will die!

The key to protecting yourself is not by injecting dangerous viruses and powerful toxic chemicals into your body. The only real, simple and natural way to prevent the flu is to build a strong and powerful immune system. This season, get yourself and your loved ones prepared!
