Primitive Life vs. “Civilized” Life

Worldwide, “**Primitive**” people who eat the food they gather (exercise) and live simple, natural, low-stress lives, will average 2 to 3 bowel movements every single day.

Worldwide, “**Civilized**” people who eat very high amounts of zero-fiber animal food, get very little exercise, and who live unnatural higher stress lives will average 3 bowel movements a WEEK.

Do the math...

Primitive:

2.5 average x 365 days x 80 years = 73,000 lifetime bowel movements

Civilized:

3 average x 52 weeks x 80 years = 12,480 lifetime bowel movements

That is over 60,000 LESS lifetime bowel movements!

FACT: Primitive people and people who eat more fiber also release 3 times more fecal matter in weight in each bowel movement.

Every single patient that walked into my clinic had too much retained waste in their bowel.

This is just a fact of life in ALL modern civilizations. It is easy to retain and store three or four pounds of fecal sludge. Some people lose 10 to 15 pounds when purged before their colonoscopy. I have had obese patients lose even more. (Read my record-breaking bowel nightmare stories from my clinic on pages 49–50 of my book, “Detoxification Volume 2”, read for free at www.herbdoc.com!)

Although many doctors will say having a few bowel movements a week is “normal” and retaining pounds of fecal matter is “normal”... It is also “normal” that Americans have the highest level of colon-rectal disease and cancer on the planet.

Our lack of attention on good elimination and digestive health has awarded Americans with the highest level of digestive disorders, bowel disease, and colon cancer in the WORLD.

Maybe worse, retained fecal waste and fecal impaction puts pressure on nearby organs and causes infection, which causes hundreds of other seemingly unrelated issues from headaches to backaches to immune disorders to hormone problems.

— Dr. Schulze

Why Unblock?

Your colon is so big that it is connected to, touches, or is in the vicinity of, every major organ in your body, except your brain. It also touches most of your blood vessels and nerves.

Constipation causes the colon to swell and when this happens, it can compress the lungs, heart, liver, gallbladder, pancreas, kidneys, adrenals, uterus or prostate. A constipated colon can cause an almost endless amount of seemingly unrelated diseases and problems.

A sluggish, swollen bowel can compress a nearby area, causing disease and infection in any area of the body. This explains why 80% of my patients

who used my Intestinal Formula #1 and did a 5-Day BOWEL Detox started to develop healthy hearts, normal blood pressure, normal blood sugar levels, balanced hormones, no fertility problems, functioning livers, normal cholesterol levels, healthy immune systems, normal urinary function, powerful adrenals, increased energy, healthy prostates, clean digestive tracts, stronger lower backs and normal leg circulation.

No matter how far removed from the colon the problem seems, cleanse the bowel first and see what happens. If you're like my patients, you will be thrilled with the results!

Every single patient in my clinic had retained waste or some type of blockage somewhere in their body, and most often it was in their bowel.

HOW DID WE GET HERE?

First, ALL animal food—meat, eggs and dairy—has absolutely NO fiber. So, when we eat it, it's really hard to get that grease and fat out of our bowel. Add in wheat and flour products, and now you have a heavy paste.

Second, we don't move our bodies much, and a sedentary lifestyle promotes constipation.

Third, in America we have way too much stress, major stress, and stress also causes constipation.

Add this all up, and you can clearly see why Americans not only have the highest incidence of constipation, but they also have the highest incidence of colon and rectal disease on the planet.

Even worse, retained fecal waste causes everything from bad skin, bad breath and backaches, to headaches and low energy and contributes to the worsening of every known major disease. In my clinic, besides increased nutrition, a thorough BOWEL CLEANSING had the biggest impact to solve chronic health problems and greatly increase my patients' overall health.

My patients were always so amazed at how much better they felt after having regular and complete bowel movements.

Why Bowel Cleansing Is So Important...

ACCUMULATED WASTE

The human body is a metabolic engine. Every system, every organ, and every cell of the human body takes in fuel to run and eliminate waste material. The majority of this waste is deposited into your colon.

In fact, the average American stores from 10 to 12 pounds of fecal matter in his or her colon. If this toxic waste isn't regularly eliminated, it will cause your body to be backed up with poisons, making it sluggish and unhealthy.

CONSTIPATION

This body of ours must have had some incredible engineer. Everything has its place and there is no extra room. If one organ swells, then another organ gets compressed or crushed. Organs don't work well when they are crushed, and circulation gets interrupted. Every organ needs good circulation to bring nutrition in and get waste out, in order to be healthy.
